SYLLABUS OF SEMESTER SYSTEM
FOR THE TRADE OF

Mechanic Diesel

Under

Craftsmen Training Scheme (CTS)
(One year/Two Semesters)

Redesigned in
2014

By
Government of India
Ministry of Labour & Employment (DGE&T)
GENERAL INFORMATION

1. Name of the Trade : Mechanic Diesel
3. Duration of Craftsmen Training : 1 Year (Two Semester having duration of six months each)
4. Power Norms : 4.8 KW
5. Space Norms : Space Area 210 Sq. Mt. (Including parking area)
6. Entry Qualification : Passed 10th class examination with maths and Science.
7. Unit strength : 16 + 30% super Numeric
8. Instructors Qualification : a) Degree in Automobile/ Mechanical Engg. (with specialization in Automobile) from recognised college/University with one year experience in the automobile industry and should possess valid LMV driving license.
   OR
   Diploma in Automobile/Mechanical (specialization in automobile) from recognized board of technical education with two years experience in the automobile industry and should posses valid LMV driving license.
   OR
   10th Passed + NTC/NAC in the Trade of “Mechanic Diesel” with 3 years post qualification experience in the relevant field and should possess valid LMV driving license.
   and
   b) With “National Crafts Instructor Certificate”.

*Note:*
1) At least one Instructor must have Degree/Diploma in Automobile/ Mechanical Engg. (with specialization in Automobile) when applied for 02 units.
2) Instructor Qualification for WCS & E.D, as per the Training Manual
9. For Employability Skills One Contract/Part Time/Guest Faculty for Generic Module .
   i) MBA/ BBA with two years experience OR Graduate in Sociology / Social Welfare / Economics with Two years experience OR Graduate / Diploma with Two years experience and trained in Employability Skills from DGET institutes

   AND

   Must have studied English / Communication Skills and Basic Computer at 12th / Diploma level and above

   OR

   Existing Social Study Instructors duly trained in Employability Skills from DGET institutes

Distribution of training on Hourly basis:

COURSE INFORMATION (MECHANIC DIESEL)

1. Introduction:

- An intensive industrial survey was made to ascertain the requirements of skill-gap in the automobile sector, a scientifically designed survey covering labour-market survey web-survey was conducted. Based on the data obtained the skills are identified and accordingly the syllabus has been drafted. Subsequently the Trade expert committed reviewed.

2. Terminal Competencies/Deliverables:

After successful completion of the above course, the trainee shall be able to perform the following skills with proper sequence.

- **Mechanic, Diesel Engine;** Oil Engine Fitter repairs services and overhauls diesel or oil engines for efficient performance as prime mover to drive machinery and equipment. Examines engine to locate defects, using various tools and instruments.

- Dismantles or partly dismantles it to remove damaged or worn out parts and replaces or repairs them.

- Replace valve and assembles parts, doing supplementary tooling and other functions as necessary to ensure accuracy of fit.

- Installs assembled or repaired engine in position and connects pulley or wheel to propulsion system. Starts engine, tunes it up and observes performance noting different meter readings such as temperature, fuel level, oil pressure, etc. and sets it to specified standard for optimum performance.

- Checks, adjusts and lubricates engine periodically and performs such other functions to keep engine in good working order.

- May solder or braze parts and service diesel fuel pumps and injectors.

- Measures essential parts like cylinder, bores piston, sizes crank pins etc. using gauges, micrometer and other precision tools and gets cylinders re-bored, liners fitted, valve seats refaced, etc.
3. Employment opportunites:

On successful completion of the course the candidates can either get employed, or become a self-employed Entrepreneur in any one of the following fields.

<table>
<thead>
<tr>
<th>a) Wage Employment</th>
<th>b) Self Employment</th>

</tr>
</tbody>
</table>

4. Further learning pathways:

- On successful completion of the course trainee can get themselves enrolled in Apprenticeship training in reputed Industrial organisation.
- The qualified candidates have scope for lateral entry into the Diploma courses offered by some of the State Governments.
- The qualified candidates can also get themselves upgraded by taking up the Second Semester at his own convenience in the CTS scheme, since the first semester is common to the following trades.

Craftsman Training Scheme

### Syllabus for the trade of Mechanic Diesel  
**First Semester  (Semester code No. )  
Duration: Six Months.**

**Syllabus for Trade practical and Trade Theory**

<table>
<thead>
<tr>
<th>Week No.</th>
<th>Trade Practical (27 Hrs/week)</th>
<th>Trade Theory (5 Hrs/week)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Familiarisation with institute, Job opportunities in the automobile sector, Machinery used in Trade. Types of work done by the students in the shop floor.</td>
<td>Admission &amp; introduction to the trade: Introduction to the Course duration, course content, study of the syllabus. General rule pertaining to the Institute, facilities available—Hostel, Recreation, Medical and Library working hours and time table</td>
</tr>
<tr>
<td>3-5</td>
<td>Practice using all marking aids, like steel rule with spring calipers, dividers, scriber, punches, Chisel etc., Layout a work piece- for line, circle, arcs and circles. Practice to measure a wheel base of a vehicle with measuring tape. Practice to measure valve spring tension using spring tension tester Practice to remove wheel lug nuts with use of an air impact wrench Practice on General workshop tools &amp; power tools.</td>
<td>Hand &amp; Power Tools:- Marking scheme, Marking material—chalk, Prussian blue. Cleaning tools—Scraper, wire brush, Emery paper, Description, care and use of Surface plates, steel rule, measuring tape, try square. Calipers-inside and outside. Dividers, surface gauges, scriber, punches—prick punch, center punch, pin punch, hollow punch, number and letter punch. Chisel-flat, cross-cut. Hammer—ball pein, lump, mallet. Screw drivers-blade screwdriver, Phillips screw driver, Ratchet screwdriver. Allen key, bench vice &amp; C-clamps, Spanners—ring spanner, open end spanner &amp; the combination spanner, universal adjustable open end spanner. Sockets &amp; accessories, Pliers - Combination pliers, multi grip, long nose, flat-nose, Nippers or pincer pliers, Side cutters, Tin snips, Circlip pliers, external circlips pliers. Air impact wrench, air ratchet, wrenches— Torque wrenches, pipe wrenches, car jet washers Pipe flaring &amp; cutting tool, pullers-Gear and bearing.</td>
</tr>
</tbody>
</table>
### Measuring practice

- Measuring practice on Cam height, Camshaft Journal dia, crankshaft journal dia, Valve stem dia, piston diameter, and piston pin dia with outside Micrometers.
- Measuring practice on the height of the rotor of an oil pump from the surface of the housing or any other auto component measurement with depth micrometer.
- Measuring practice on valve spring free length.
- Measuring practice on cylinder bore, Connecting rod bore, inside diameter (ID) of a camshaft bearing with Telescope gauges.
- Measuring practice on cylinder bore for taper and out-of-round with Dial bore gauges.
- Measuring practice to measure wear on crankshaft end play, crankshaft run out, and valve guide with dial indicator.
- Measuring practice to check the flatness of the cylinder head is warped or twisted with straightedge is used with a feeler gauge.
- Measuring practice to check the end gap of a piston ring, piston-to-cylinder wall clearance with feeler gauge.
- Practice to check engine manifold vacuum with vacuum gauge.
- Practice to check the air pressure inside the vehicle tires is maintained at the recommended setting.

### Systems of measurement

- Description, care & use of - Micrometers- Outside and depth micrometer, Micrometer adjustments, Vernier calipers, Telescope gauges, Dial bore gauges, Dial indicators, straightedge, feeler gauge, thread pitch gauge, vacuum gauge, tire pressure gauge.

### Practice on General cleaning, checking and use of nut, bolts, & studs etc.,

- Removal of stud/bolt from blind hole.

- Practice on cutting tools like Hacksaw, file, chisel, Sharpening of Chisels, center punch, safety precautions while grinding.

### Fasteners

- Study of different types of screws, nuts, studs & bolts, locking devices, Such as lock nuts, cotter, split pins, keys, circlips, lock rings, lock washers and locating where they are used.

- Washers & chemical compounds can be used to help secure these fasteners. Function of Gaskets, Selection of materials for gaskets and packing, oil seals.

### Cutting tools

- Study of different type of cutting tools like Hacksaw, File- Definition, parts of a file, specification, Grade, shape, different type of
| Practice on Hacksawing and filing to given dimensions. | cut and uses., OFF-hand grinding with sander, bench and pedestal grinders, safety precautions while grinding. **Limits, Fits & Tolerances:** Definition of limits, fits & tolerances with examples used in auto components, **Drilling machine** - Description and study of Bench type Drilling machine, Portable electrical Drilling machine, drill holding devices, Work Holding devices, Drill bits. **Taps and Dies:** Hand Taps and wrenches, Calculation of Tap drill sizes for metric and inch taps. Different type of Die and Die stock. **Screw extractors.** **Hand Reamers** – Different Type of hand reamers, Drill size for reaming, Lapping, Lapping abrasives, type of Laps. |
| Practice on Marking and Drilling clear and Blind Holes, Sharpening of Twist Drills Safety precautions to be observed while using a drilling machine. Practice on Tapping a Clear and Blind Hole, Selection of tape drill Size, use of Lubrication, Use of stud extractor. Cutting Threads on a Bolt/ Stud. Adjustment of two piece Die, Reaming a hole/ Bush to suit the given pin/ shaft, scraping a given machined surface. | Practice on making Rectangular Tray. Pipe bending, Fitting nipples unions in pipes. Soldering and Brazing of Pipes. **Drilling machine** - Description and study of Bench type Drilling machine, Portable electrical Drilling machine, drill holding devices, Work Holding devices, Drill bits. **Taps and Dies:** Hand Taps and wrenches, Calculation of Tap drill sizes for metric and inch taps. Different type of Die and Die stock. **Screw extractors.** **Hand Reamers** – Different Type of hand reamers, Drill size for reaming, Lapping, Lapping abrasives, type of Laps. |
| Diagnose series, parallel, series-parallel circuits using Ohm’s law, Check electrical circuit with a test lamp, perform voltage drop test in circuits using multimeter, measure current flow using multimeter /ammeter, use of service manual wiring diagram for troubleshooting. | Diagnose series, parallel, series-parallel circuits using Ohm’s law, Check electrical circuit with a test lamp, perform voltage drop test in circuits using multimeter, measure current flow using multimeter /ammeter, use of service manual wiring diagram for troubleshooting. **Fuses & circuit breakers, Ballast resistor, Stripping wire insulation, cable colour codes and sizes, Resistors in Series circuits , Parallel circuits and Series-parallel circuits, Electrostatic effects, Capacitors and its applications, Capacitors in series and parallel.** |
| Cleaning and topping up of a lead acid battery, Testing battery with Digital multimeter, continuity test for fuses, jumper wires, fusible links, circuit breakers. | Cleaning and topping up of a lead acid battery, Testing battery with Digital multimeter, continuity test for fuses, jumper wires, fusible links, circuit breakers. **Fuses & circuit breakers, Ballast resistor, Stripping wire insulation, cable colour codes and sizes, Resistors in Series circuits , Parallel circuits and Series-parallel circuits, Electrostatic effects, Capacitors and its applications, Capacitors in series and parallel.** **Description of Chemical effects, Batteries & cells, Lead acid batteries & Stay Maintenance Free (SMF) batteries, Magnetic effects, Heating** |
| 9 | hydrometer. Connecting battery to a charger for battery charging, Inspecting & testing a battery after charging, Measure and Diagnose the cause(s) of excessive Key-off battery drain (parasitic draw) and do corrective action. Testing of relay and solenoids and its circuit. | effects, Thermo-electric energy, Thermisters, Thermo couples, Electrochemical energy, Photovoltaic energy, Piezo-electric energy, Electromagnetic induction, Relays, Solenoids, Primary & Secondary windings, Transformers, stator and rotor coils. |
| 16 | Identify and test power and signal connectors for continuity, Identify and test different type of Diodes, NPN & PNP Transistors for its functionality, Construct and test simple logic circuits OR, AND & NOT and Logic gates using switches. | **Basic electronics**: Description of Semi conductors, Solid state devices- Diodes, Transistors, Thyristors, Uni Junction Transistors (UJT), Metal Oxide Field Effect Transistors (MOSFETs), Logic gates-OR, AND & NOT and Logic gates using switches. |
| 17& 18 | Practice to make straight beads and Butt, Lap & T joints Manual Metal Arc Welding. Setting of Gas welding flames, practice to make a straight beads and joints Oxy – Acetylene welding Film on Heat treatment process | **Introduction to welding and Heat Treatment**

**Welding processes** – Principles of Arc welding, brief description, classification and applications. Manual Metal Arc welding -principles, power sources, electrodes, welding parameters, edge preparation & fit up and welding techniques; Oxy – Acetylene welding - principles, equipment, welding parameters, edge preparation & fit up and welding techniques;  

**Introduction to Hydraulics & Pneumatics:** - Definition of Pascal law, pressure, Force, viscosity. Description, symbols and application in automobile of Gear pump-Internal & External, single acting, double acting & Double ended cylinder; Directional control valves-2/2, 3/2, 4/2, 4/3 way valve, Pressure relief valve, Non return valve, Flow control valve used in automobile. |
<table>

| 1 & 2    | Identification of parts in a diesel engine of LMV/ HMV  
Practice on starting and stopping of diesel engines.  
Observe and report the reading of Tachometer, Odometer, temp and Fuel gauge under ideal and on load condition.  
Practice on dismantling Diesel engine of LMV/HMV as per procedure. | **Introduction to Engine:**  
Description of internal & external combustion engines, Classification of IC engines, Principle & working of 2&4-stroke diesel engine (Compression ignition Engine (C.I)), Principle of Spark Ignition Engine(SI), differentiate between 2-stroke and 4 stroke, C.I engine and S.I Engine, Direct injection and Indirect injection, Technical terms used in engine, Engine specification. Study of various gauges/instrument on a dash board of a vehicle- Speedometer, Tachometer, Odometer and Fuel gauge, and Indicators such as gearshift position, Seat belt warning light, Parking-brake-engagement warning light and an Engine-malfunction light.  
Different type of starting and stopping method of Diesel Engine  
Procedure for dismantling of diesel engine from a vehicle.. |
| 3 & 4    | Overhauling of cylinder head assembly, Use of service manual for clearance and other parameters, Practice on removing rocker arm assembly manifolds.  
Practice on removing the valves and its parts from the cylinder head, cleaning.  
Inspection of cylinder head and manifold surfaces for warping, cracks and flatness.  
Checking valve seats & valve guide – Replacing the valve if necessary. Testing leaks of valve seats for leakage – Dismantle rocker shaft assembly -clean & check rocker shaft-and levers, for wear and cracks and reassemble. Check valve springs, tappets, push rods, tappet screws and valve stem cap. Reassembling valve parts in sequence, refit cylinder head and manifold & rocker arm assembly, adjustable valve clearances, starting engine after adjustments. | **Diesel Engine Components:** Description and Constructional feature of Cylinder head. Importance of Cylinder head design. Type of Diesel combustion chambers, Effect on size of Intake & exhaust passages, Head gaskets. Importance of Turbulence  
**Valves & Valve Trains-** Description and Function of Engine Valves, different types, materials. Type of valve operating mechanism, Importance of Valve seats, Valve seats inserts in cylinder heads, importance of Valve rotation, Valve stem oil seals, size of Intake valves, Valve trains, Valve- timing diagram, concept of Variable valve timing. Description of Camshafts & drives , Description of Overhead camshaft, importance of Cam lobes, Timing shafts & chains, Timing belts & tensioners. |

<td>5</td>
<td>Overhauling piston and connecting rod Assembly. Use of service manual for clearance and other parameters:- Practice on removing oil sump and oil pump – clean the sump. Practice on removing the big end bearing, connecting rod with the piston. Practice on removing the piston rings; Dismantle the piston and connecting rod. Check the side clearance of piston rings in the piston groove &amp; lands for wear. Check piston skirt and crown for damage and scuffing, clean oil holes. Measure -the piston ring close gap in the cylinder, clearance between the piston and the liner, clearance between crank pin and the connecting rod big end bearing. Check connecting rod for bend and twist. Assemble the piston and connecting rod assembly.</td>
</tr>
<tr>
<td>6</td>
<td>Overhauling of crankshaft. Use of service manual for clearance and other parameters:- Practice on removing damper pulley, timing gear/timing chain, flywheel, main bearing caps, bearing shells and crankshaft from engine checking oil retainer and thrust surfaces for wear, Measure crank shaft journal for wear, taper and ovality, Checking crankshaft for fillet radii, bend &amp; twist.</td>
</tr>
<tr>
<td>7</td>
<td>Checking of flywheel and mounting flanges, spigot, bearing. Check vibration damper for defects, Practice on removing cam shaft from engine block, Check for bend &amp; twist of camshaft. Inspection of cam lobe, camshaft journals and bearings and measure cam lobe lift. Fixing bearing inserts in cylinder block &amp; cap check nip and spread clearance &amp; oil holes &amp; locating lugs fix crank shaft on block-torque bolts - check end play remove shaft - check seating, repeat similarly for connecting rod and Check seating and refit.</td>
</tr>
<tr>
<td>8</td>
<td>Cleaning and Checking of cylinder blocks Surface for any crack, flatness, Measure cylinder bore for taper &amp; ovality, clean oil gallery passage and oil pipe line, Bore - descale water passages and examine Removing cylinder liners from scrap cylinder block, practice in measuring and Descriptive &amp; functions of different types of pistons, piston rings and piston pins and materials. Used recommended clearances for the rings and its necessity precautions while fitting rings, common troubles and remedy. Compression ratio. Description &amp; function of connecting rod, importance of big- end split obliquely, Materials used for connecting rods big end &amp; main bearings. Shells piston pins and locking methods of piston pins. Description and function of Crank shaft, camshaft, Engine bearings- classification and location – materials used &amp; composition of bearing materials- Shell bearing and their advantages- special bearings material for diesel engine application bearing failure &amp; its causes-care &amp; maintenance. Crank-shaft balancing, Firing order of the engine. Description and function of the fly wheel and vibration damper. Crank case &amp; oil pump, gears timing mark, Chain sprockets, chain tensioner etc. Function of clutch &amp; coupling units attached to flywheel. Description of Cylinder block, Cylinder block construction, and Different type of Cylinder sleeves (liner).</td>
</tr>
<tr>
<td>9</td>
<td>Reassemble all parts of engine in correct Sequence and torque all bolts and nuts as per workshop manual of the engine. Engine component procedures- Testing cylinder compression, Checking idle speed, Removing &amp; replacing a cam belt, Inspecting &amp; adjusting an engine drive belt, Replacing an engine drive belt.</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>10-12</td>
<td>Practice on Checking &amp; Top up coolant, Draining &amp; refilling coolant, Checking / replacing a coolant hose, Testing cooling system pressure, Practice on Removing &amp; replacing radiator/ thermostat. Inspect the radiator pressure cap, Testing of thermostat. Cleaning &amp; reverse flushing. Overhauling water pump and refitting. Practice on Checking engine oil, Draining engine oil, Replacing oil filter, Refilling engine oil. Overhauling of oil pump, oil coolers, air cleaners and air filters and adjust oil pressure relief valves, repairs to oil flow pipe lines and unions if necessary.</td>
</tr>
<tr>
<td>13</td>
<td>Practice on Dismantling air compressor and exhauster and cleaning all parts - measuring wear in the cylinder, reassembling all parts and fitting them in the engine. Dismantling &amp; assembling of turbocharger, check for axial clearance as per service manual. Check Exhaust system for rubber mounting for damage, deterioration and out of position; for leakage, loose connection, dent and damage; Practice on Exhaust manifold removal and installation. Practice on Catalytic converter removal and installation.</td>
</tr>
</tbody>
</table>
| 14 - 16 | Practice on removing & Cleaning fuel tanks, checking leaks in the fuel lines, soldering & repairing pipe lines and Unions, brazing nipples to high pressure line studying the fuel feed system in diesel engines, draining of water separators.  
Bleeding of air from the fuel lines, Servicing primary & secondary filters.  
Removing a fuel injection pump from an engine-refit the pump to the engine re- set timing - fill lubricating-oil start and adjust slow speed of the engine.  
Practice on overhauling of injectors and testing of injector.  
**Diesel Fuel Systems**- Description and function of Diesel fuel injection, fuel characteristics, concept of Quiet diesel technology & Clean diesel technology.  
**Diesel fuel system components** – Description and function of Diesel tanks & lines, Diesel fuel filters, water separator, Lift pump, Plunger pump, Priming pump, Inline injection pump, Distributor-type injection pump, Diesel injectors, Glow plugs, Cummins & Detroit Diesel injection.  
**Electronic Diesel control**- Electronic Diesel control systems, Common Rail Diesel Injection (CRDI) system, Hydraulically actuated electronically controlled unit injector (HEUI) diesel injection system. Sensors, actuators and ECU (Electronic Control Unit) used in Diesel Engines. |
| 17 | Practice on Start engine adjust idling speed and damping device in pneumatic governor and venture control unit checking Performance of engine with off load adjusting timings. Start engine- adjusting idle speed of the engine fitted with mechanical governor checking- high speed operation of the engine.  
Checking performance for missing cylinder by isolating defective injectors and test- dismantle and replace defective parts and reassemble and refit back to the engine. | **Marine & Stationary Engine**: Types, double acting engines, opposed piston engines, starting systems, cooling systems, lubricating systems, supplying fuel oil, hydraulic coupling, reduction gear drive, electromagnetic coupling, electrical drive, generators and motors, supercharging. |
| 18 | Monitoring emissions procedures by use of Engine gas analyser or Diesel smoke meter. Checking & cleaning a Positive crank case ventilation (PCV) valve. Obtaining & interpreting scan tool data. Inspection of EVAP canister purge system by use of scan Tool.

<tr>
<td>4-6</td>
<td><strong>Trigonometry</strong> - Types of triangle - Acute angled triangle, Obtuse angled triangle, Equilateral triangle, Isosceles triangle, Scalene triangle, Right angled triangle, Labelling sides and angles of a triangle, Sum of the three angles of a triangle, Pythagoras’ theorem, Circles, Ratio of diameter and circumference, Length of arc, Timing marks, Wheel revolutions and distance travelled, Valve opening area.</td>
</tr>
<tr>
<td></td>
<td><strong>Trigonometry</strong> - Using sines, cosines and tangents to solve vehicle problems.</td>
</tr>
<tr>
<td>7-10</td>
<td>Formulae for Perimeter and Area of Plane figure - Rectangle, Square, Parallelogram, Triangle, Hexagon, any regular polygon, Trapezium, Circle, sector, Fillet, Ellipse, segment of a circle; Formulae for Volume and surface area of solids- Rectangular solid, Prism, cylinder, pyramids and cones, Frustum of pyramid and cones, sphere, Hollow sphere, segment of sphere, circular ring, spherical sector, Calculation of volume and weight of simple solid bodies such as cubes, square and hexagonal prism-shop problem.</td>
</tr>
<tr>
<td>11-13</td>
<td>Statistics – Collecting and sorting raw data, Definition of Discrete variable, continuous variable with Shop examples, Constructing pictographs-pie chart, Bar chart, Frequency and tally Charts. Importance of the shape of a frequency distribution- histogram, frequency polygon, Cumulative frequency plot. Interpreting statistics- sampling, arithmetic mean, median.</td>
</tr>
<tr>
<td>14 &amp; 15</td>
<td><strong>Heat and temperature</strong> – Temperature-Thermodynamic temperature scale (Kelvin), Cooling system temperature; Standard temperature and pressure (STP); Thermal expansion with calculation; Heat- Sensible heat, Latent heat, Specific latent heat, Specific heat capacity, Quantity of heat with calculation; Heat transfer – Conduction, Convection, Radiation;</td>
</tr>
<tr>
<td>16 &amp; 17</td>
<td><strong>Heating, expansion and compression of gases</strong> - Absolute pressure, Absolute temperature; Laws relating to the compression and expansion of gases - Heating a gas at constant volume, Heating a gas at constant pressure, Charles’ law. Expansion or compression at constant temperature – isothermal</td>
</tr>
<tr>
<td>18-20</td>
<td><strong>Internal combustion engines</strong>- Engine power, Brake power, Horsepower, PS – the DIN, Indicated power, Mean effective pressure, Calculation of indicated power, Cylinder pressure vs. crank angle, Mechanical efficiency of an engine, Volumetric efficiency, Torque vs. engine speed, Specific fuel consumption vs. engine speed, Brake power, torque and sfc (Specific fuel consumption) compared, Brake mean effective pressure, Thermal efficiency, Indicated thermal efficiency, Brake thermal efficiency petrol vs. Diesel.</td>
</tr>
<tr>
<td>21</td>
<td><strong>Fuels and combustion</strong>- Calorific value, Combustion-Products of combustion, Relevant combustion equations. Air–fuel ratio-Petrol engine combustion, Detonation, Pre-ignition, Octane rating, Diesel fuel, Flash point, Pour point, Cloud point, Biofuels, Liquefied petroleum gas (LPG), Hydrogen, Zero emissions vehicles (ZEVs)</td>
</tr>

Automobile Group –  
2nd Semester  
**Engineering Drawing**  
Syllabus for the trade of **Mechanic Diesel**

<table>
<thead>
<tr>
<th>Week Nos.</th>
<th><strong>Engineering Drawing (3 Hrs/week)</strong> 2nd Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-4</td>
<td>Read and interpret drawings- Determine information from the title block, Read and interpret industrial prints, Read and interpret detailed and assembly drawings. Identify casting drawings and machining drawings, Read and interpret diagrams, Distinguish between a monodetail and a multidetail drawing.</td>
</tr>
<tr>
<td>5-8</td>
<td>Identify different drawing projections - Interpret pictorial and multi-view drawings. Interpret auxiliary and section views, Determine views in a drawing and the significance of the view being shown. Identify missing lines and missing views.</td>
</tr>
<tr>
<td>9-12</td>
<td>Free hand sketching of key and screw threads. Read and interpret three Types of screw thread representation: pictorial, schematic and simplified presentation. Terms used in describing a threaded Part, Designation of Thread Specifications, Left-Hand Thread Notations, read and interpret the different type of Finish Symbols, Fillets and Rounds and Machine Slots.</td>
</tr>
<tr>
<td>14</td>
<td>Sketching of otto cycle, Diesel cycle, valves and valve timing diagram.</td>
</tr>
<tr>
<td>15</td>
<td>Free hand sketch of piston assembly, Free hand sketching of piston gudgeon pins rings and connecting rod .</td>
</tr>
<tr>
<td>16</td>
<td>Free hand sketching of crank shaft and cam shaft showing all parts.</td>
</tr>
<tr>
<td>17</td>
<td>Free hand sketching of cylinder block and cylinder head, cylinder liners .</td>
</tr>
<tr>
<td>18</td>
<td>Free hand sketching of different cooling system -showing all necessary parts such as water pump, thermostatic valve, Radiator etc.</td>
</tr>
<tr>
<td>19</td>
<td>Free hand sketching of lubrication system, showing all necessary parts such as filters , oil pump, pressure release valve etc.</td>
</tr>
<tr>
<td>20</td>
<td>Freehand sketching of starting system.</td>
</tr>
<tr>
<td>21</td>
<td>Freehand sketching of charging system and solenoid switch circuit.</td>
</tr>
